If You're Serious About Genetic Engineering only One Data System has the Coverage You Can Rely On!

Telegen

Worldwide genetic engineering and biotechnology intelligence network

is the First
System for
Targeted Data
You Need—Now!

Information is the key to assured growth in the multi-billion dollar, many-sided field of Genetic Engineering and Biotechnology. ENVIRONMENT INFORMATION CENTER, INC. (EIC) has just introduced the first all-inclusive Information System covering all aspects of Genetic Technology. It is called TELEGEN®.

Incorporating hard, primary source data concisely digested into abstract form and derived from universities, independent laboratories, private corporations, government agencies and professional and technological meetings—as well as important information from journal literature. Gathered from around the world by EIC. The System consists of...

- **TELEGEN REPORTER**—a monthly, keeping you up-to-date with current events. Including just announced research, government studies, significant appointments, etc. Then over 300 carefully focused abstracts of new findings, government regulations, industrial applications, conference proceedings—even hard-to-get data such as rarely published monographs. Along with material having an economic, political or social impact. In all, some 3,600 pin-pointed abstracts throughout the year.
- **TELEGEN QUICKTEXT**—a system giving you the option of fast, full text retrieval of reports, papers or articles abstracted for the TELEGEN REPORTER—or from the TELEGEN 1973-1980 backfile.
- **TELEGEN REPORTER REVIEW**—a year end, two-volume hard cover annual. One volume is a unique, five-part index; the other volume contains the cumulated year's abstracts, and providing a complete listing of the year's most important data.

Backed by over a decade of experience in developing similar critical information systems, EIC has the proven know-how in finding and delivering the enormous professional and technological output from this vast, multi-disciplinary field. All in a coherent, quickly accessible system you can rely on.

Better yet, you can get TELEGEN now at \$1,200.

Send for your subscription today.

Visit EIC at the 82nd Annual Medical Library Association Meeting, June 14th- 17th, Anaheim, California at the Disneyland Hotel, Booth #42.

MEDICAL LIBRARY ASSOCIATION

JUNE 11-17, 1982

DISNEYLAND HOTEL
ANAHEIM, CALIFORNIA

**Come by our booth
and learn about
something new—
Majors Comprehensive
Subscription Service.**

We've expanded our subscription service. And now it's new, improved, and better than ever, thanks to a computer program developed especially for Majors.

Looking for a subscription service with a secure future? Majors has the answer.

Don't forget Majors also has the largest inventory of medical books in the US, conveniently shipped from four branches. And we're fully automated for faster, more reliable service.

OCLC/MLA: In Touch with Today's Challenges

For over a decade you've been touching us, and we've been responding. Today libraries from specialized fields like the medical profession comprise an important segment of the over 3,000 OCLC participants. The range of OCLC's automated systems and services offers a practical and efficient solution to the host of challenges confronting medical libraries.

While at the conference, visit our booth #62-63. Our complete line of centralized and localized library services includes:

- Integrated automated systems supporting Cataloging, Serials Control/Union Lists, ILL, and Acquisitions
- Independent total processing capabilities of OCLC's local library systems
- Multiple information resources of BRS and DIALOG, brokered through OCLC's Affiliated Online Services

We've Graduated!

You've known us as a leading review book publisher. We've helped thousands of students through medical school. And we're still helping, long after graduation day. Take a look at our growing list of *hardcover* books for clinical practice. Books covering all the specialties and subspecialties of medicine. Books with today's diagnostic and therapeutic modalities.

Medical Examination Publishing... much more than review books!

Introduction to Medical Hypnosis (300)	\$25.00
Guide to Patient Evaluation, 4/e (957) SPRING	about 28.00
Essential Neurology, 2/e (740)	32.50
Concise Textbook of Gynecology (585) SPRING	about 30.00
<i>Contemporary Surgical Management Series</i>	
Gastroesophageal Carcinoma (289)	25.00
Benign Diseases of the Esophagus (544)	30.00
Surgical Infections (693) SPRING	about 30.00
<i>Contemporary Patient Management Series</i>	
Anxiety — A Guide to Biobehavioral Diagnosis and Therapy (696)	22.50
Chronic Renal Failure (912)	30.00
Inflammatory Bowel Disease (558)	21.00
<i>New Directions in Therapy</i>	
Adult Psychiatry (848) SPRING	about 40.00
Diabetes and Metabolic Diseases (679) SPRING	about 30.00
Pediatric Otolaryngology (695) SPRING	about 35.00
Pediatric Nephrology (846) SPRING	about 60.00
<i>Focus on Clinical Diagnosis</i>	
Pediatric Allergic Diseases, 2/e (286) SPRING	about 37.50

EXPERTO CREDE*

As Latin forms a strong foundation for many languages, Worden forms a strong basis for effective medical libraries.

The Nordika, Marlborough, and Harford Library Furniture Systems offer a wide choice of support furniture for the library professional in many disciplines. Complementing the three lines is a complete line of desks, seating, shelving, and cabinets to create a successful library design, providing furniture needed for information storage, retrieval, and processing.

Using The Worden Company to establish a strong foundation for your medical library needs, makes sense in any language.

Your search for highly focused bibliographies online is over!

**Stop by Booths 99A
and B for daily
demonstrations
of the new ISI®
Search Network
data bases.**

If you need precise, focused bibliographies of current journal articles, be sure to stop by Booths 99A and B for a demonstration of the ISI Search Network. This new online information retrieval system helps users perform comprehensive, high-precision searches *quickly, easily, and economically.*

The ISI Search Network includes a number of comprehensive data bases that can be accessed through a variety of search techniques including the all-new capability—research-front specialty searching. Daily demonstrations will feature how to search by research-front specialties and will highlight two specific data bases...

- **ISI/BIOMED™** — covering over 800,000 articles from over 1,400 journals worldwide, in all biomedical disci-

plines, from 1979 to the present.

- **ISI/ISTP&B™** (*Index to Scientific & Technical Proceedings & Books*)—including over 400,000 items from 1978 to date; annually indexing articles from over 3,300 scientific proceedings and over 1,650 multi-authored books (including review series).

Information will also be available on *ISI/CompuMath™* and other new data bases coming soon to the ISI Search Network.

So look no further for high-precision, highly focused bibliographies!

Just stop by Booths 99A and B—and see for yourself how the ISI Search Network will let you perform quick, easy, and low-cost searches with the precision you need. We'll see you there!

ORBIT[®]
answers questions
you didn't even know could
be asked.

Is there anyone, anywhere, who's invented just what you need? A consultant who's been working on your exact project? Someone who has developed an alternate energy source you can use?

Ask ORBIT—The Information Retrieval System of SDC Search Service. You'll quickly get information you thought was either so broad, or so very specialized, you didn't know where to start looking.

Start with ORBIT. For comprehensive databases—many of them exclusive. And our unique CROSSFILE feature that makes searching easy—no matter how broad or narrow the field. Japanese mini-computers? Storing Loire Valley wine, vintage '78?

No question about it: the answers are in ORBIT.

For ORBIT System Information, call:

SDC Search Service, (800) 421-7229.

ANNUAL MEETING HIGHLIGHTS

Sunday, June 13

10:00 a.m. – 4:00 p.m.

Tours

Several special tours have been arranged to provide MLA '82 participants with an opportunity to see some of the unique sights of Southern California. Choose either the Pasadena/Huntington Library Art Museum and Botanical Gardens Tour or the Early California Tour. For lovers of fine art, beautiful gardens, and rare books the Huntington Library and Art Museum is not to be missed; those interested in early California history or who have never seen the lovely Southern California coastline should take advantage of the Early California tour. Either tour warrants your early arrival in Anaheim and allows you to return in time for the welcoming festivities on Sunday evening.

12:00 p.m. – 10:00 p.m.

Disneyland Park: MLA '82 Private Party

At Disneyland Hotel's Travelport, step aboard the monorail to the Magic Kingdom. For the single fixed price of \$6.50, MLA '82 participants will have unlimited use of all rides in Disneyland Park as part of a private party with another organization. The Park will be open to us from 12 noon to 12 p.m. with in-and-out access permitted as often as desired. This will make it possible for you to take time out for the Welcome Party at the hotel, then return again to the Park. The many restaurants in the Park make it an ideal place for dinner after the Welcome Party.

5:15 p.m. – 6:30 p.m.

New Members/International Visitors/First Time Attendees Welcome Tea and Orientation

Members attending their first Annual Meeting and new members or visitors from outside the United States and Canada are invited to attend this orientation session sponsored by the Membership Committee. The Committee will present information to help you get the most out of your first MLA meeting.

Sunday, June 13 (continued)

- 5:15 p.m. — 6:30 p.m. **New Members . . . (continued)**
Immediately preceding the orientation session, new members, first-time attendees and visitors from abroad are invited to meet Association's officers, Board of Directors, Committee Chairmen, members of the Membership, International Cooperation, and the National Program Committees. This is an excellent opportunity to make new acquaintances and to meet some of the leaders of MLA.
- 6:30 p.m. — 7:30 p.m. **Welcome Party/Wine and Cheese Tasting**
A lovely outdoor garden area will be the setting for the Welcome Party featuring California wines accompanied by a variety of cheeses. Join your MLA colleagues at this informal event which is the perfect send-off to an evening at Disneyland. Musical entertainment will be provided by Phil Birdsell.

Monday, June 14

- 10:00 a.m. — 7:30 p.m. **Exhibit Opening and Exhibitor's Cocktail Party**
The Exhibits will open Monday, June 14, at 10:00 a.m. to allow registrants maximum opportunity to visit the over 100 exhibits. On Monday evening at 7:30 p.m., join us in the exhibit area for a complimentary drink and an additional opportunity to visit the exhibits.

Tuesday, June 15

- 4:00 p.m. — 11:00 p.m. **Library Tours**
Take one of the tours to the Medical School Libraries in Los Angeles and Orange counties. Following your library visit, you will have time for dinner in a restaurant of your choice in either Westwood Village, Chinatown, or Newport Beach. The return trip to Anaheim will include visits to various points-of-interest in the Los Angeles/ Orange county area.

Tuesday, June 15 (continued)

6:00 p.m. — 8:00 p.m. Newport Beach Dine-Around

If you are unable to participate in one of the tours, the Newport Beach Dine-Around provides an excellent and inexpensive opportunity for dinner in one of Southern California's loveliest beach communities.

Wednesday, June 16

7:00 a.m. — 11:00 p.m. Banquet

The annual banquet has been scheduled for Wednesday evening and promises to provide an enjoyable evening of musical entertainment and conviviality. The "no host" cocktail reception prior to the banquet will feature Latin American music. Bob's California Big Band will entertain us after a south-of-the-border dinner with selections from band music popular in the 30's and 40's.

A special feature of this year's banquet will be the presentation of the Association's top awards, including the Marcia Noyes award, the honorary members, and fellows.

GENERAL INFORMATION

Registration

Registration will be in the ~~La Strada~~ Registration Area of the Convention Center of the Disneyland Hotel during the following hours:

Thursday, June 11 <i>May 26</i>	3:00 p.m. - 8:00 p.m.
Friday, June 12 <i>May 27</i>	3:00 p.m. - 8:00 p.m.
Saturday, June 13 <i>May 28</i>	7:00 a.m. - 7:00 p.m.
Sunday, June 14 <i>May 29</i>	7:00 a.m. - 7:00 p.m.
Monday, June 15 <i>May 30</i>	8:00 a.m. - 4:00 p.m.
Tuesday, June 16 <i>May 31</i>	9:00 a.m. - 4:00 p.m.
Wednesday, June 17 <i>June 1</i>	9:00 a.m. - 4:00 p.m.
Thursday, June 18 <i>June 2</i>	9:00 a.m. - 12:00 p.m.

① Meeting material including badges, tickets and program-related materials will be distributed in the registration area. Continuing Education course participants will receive information at that time. Information about special events, room locations for all events and further changes and additions to the program will be found in Special Announcements in the daily newspaper.

② Ticket Sales

Tickets to special events will be sold in the registration area up to twenty-four hours before the function, subject to availability.

Meeting Rooms

Meeting rooms are in three separate conference centers located on the Disneyland Hotel grounds:

Embassy/Magnolia Center	Sierra Conference Center	Bonita Conference Center
Embassy Room	Alamitos Room	Santa Barbara Room
Embassy West	Balboa Room	Santa Catalina Room
Embassy East	Cerritos Room	San Clemente Room
Magnolia Room	Olympic Room	Santa Cruz Room
Magnolia A	Orange Room	Santa Rosa Room
Magnolia B	Pacific Room	
Magnolia C	Palm Room	
	Regency Room	
	Serrano Room	
	Sierra Room	
	Yorba Room	

For the location of the meeting rooms in each Conference Center, please refer to the map on pages 117-118.

Exhibits

Exhibits will be open during the following hours:

Monday, June 14	10:30 a.m. — 5:00 p.m. 7:30 p.m. — 9:30 p.m.
Tuesday, June 15	10:00 a.m. — 5:00 p.m.
Wednesday, June 16	10:00 a.m. — 5:00 p.m.
Thursday, June 17	10:00 a.m. — 12:00 p.m.

Placement Service

The Placement Service will be located in the Disneyland Hotel Convention Center North Lounge, near the exhibit hall. It will maintain a set of notebooks for resumes of job candidates and a set of notebooks and a bulletin board listing job openings. The notebooks will be available for general browsing and interviews may be arranged. The Placement Service will be open during the following hours:

Friday, June 11 <i>May 27</i>	4:00 p.m. — 8:00 p.m.
Saturday, June 12 <i>May 28</i>	4:00 p.m. — 8:00 p.m. 4:30 p.m. — 6:00 p.m.
Sunday, June 13 <i>May 29</i>	8:00 a.m. — 9:00 a.m. 4:30 p.m. — 6:00 p.m.
Monday, June 14 <i>May 30</i>	8:30 a.m. — 4:30 p.m.
Tuesday, June 15 <i>May 31</i>	8:30 a.m. — 4:30 p.m.
Wednesday, June 16 <i>1</i>	8:30 a.m. — 4:30 p.m.
Thursday, June 17 <i>2</i>	8:30 a.m. — 4:30 p.m.

Hospitality

Welcome to Disneyland! The Hospitality Center has information available on the conference events and the surrounding areas of Anaheim. So drop in and relax for awhile, meet your friends and have your questions answered. The Hospitality Center will be located in the Mandarin Lounge, June 11 through 13, and the Exhibit Hall, June 14 through June 17, during the following hours:

Friday, June 11	3:00 p.m. — 6:00 p.m.	Mandarin Lounge
Saturday, June 12	8:00 a.m. — 10:00 a.m.	Mandarin Lounge
	2:00 p.m. — 7:00 p.m.	Mandarin Lounge
Sunday, June 13	9:00 a.m. — 5:00 p.m.	Mandarin Lounge
Monday, June 14	8:00 a.m. — 5:00 p.m.	Exhibit Hall
Tuesday, June 15	8:30 a.m. — 4:30 p.m.	Exhibit Hall
Wednesday, June 16	8:30 a.m. — 4:30 p.m.	Exhibit Hall
Thursday, June 17	8:30 a.m. — 12:00 p.m.	Exhibit Hall

MLA Scholarship Booth

The MLA Scholarship Booth is located adjacent to the Registration Area and is open during the following hours:

Saturday, June 12	8:00 a.m. — 3:00 p.m.
Sunday, June 13	8:00 a.m. — 3:00 p.m.
Monday, June 14	8:00 a.m. — 3:00 p.m.
Tuesday, June 15	8:00 a.m. — 4:00 p.m.
Wednesday, June 16	9:00 a.m. — 3:00 p.m.
Thursday, June 17	9:00 a.m. — 1:00 p.m.

Daily Newspaper

The *Dateline Disneyland* will report changes, cancellations or additions to the printed program including unofficial groups and informal meetings. Tidbits on local events and attractions will also be included. Copy for the next day's issue must be submitted by 3 p.m. to the press office. Pick up a copy at the Hospitality Center, Registration Area, or the entrance to General Sessions.

Convention Ribbons

White	Officers and Board Members

THE B/NA APPROVAL PLAN: TAILORED TO LIBRARY NEEDS, NOT BOOKSELLER LIMITATIONS.

You've probably heard about other new "controlled" or "efficient" approval plans. Actually they're similar to what our staff began with in 1965—approval plans with a limited selection of publishers. The theory? That they can cover roughly 90% of the publications of academic interest.

But 90% coverage isn't good enough for us. That additional 10% means at least 2,000 scholarly books per year which you miss.

In contrast, B/NA provides comprehensive services to academic and research libraries.

You receive all the approval books or announcements appropriate to your collection. Our subject thesaurus, with over 5,000 descriptors, systematically spans the universe of knowledge. Apply non-subject parameters as well, and tailor B/NA's Approval Plan precisely to your needs—not to ours.

Moreover, no other approval plan gives you B/NA's New Books Status Report. Updated and circulated monthly, it minimizes your uncertainties. The NBSR lists on microfiche all action taken on new books during the current and preceding year—on order, not published, treated, not appropriate and so on.

With the NBSR you get all the information we have on new books as soon as we have it.

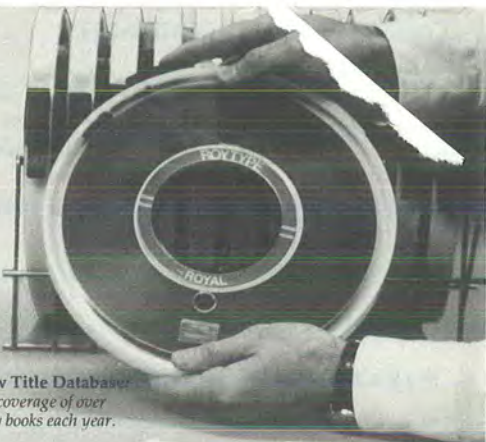

Call your Regional Sales Manager or nearest distribution center toll free for details on how B/NA's Approval Plan gives you more.

9:00 a.m. – 5:00 p.m.

BRS: MeSH Training Magnolia Room B, Magnolia Center

Monday, June 14

12:30 p.m. – 2:00 p.m.

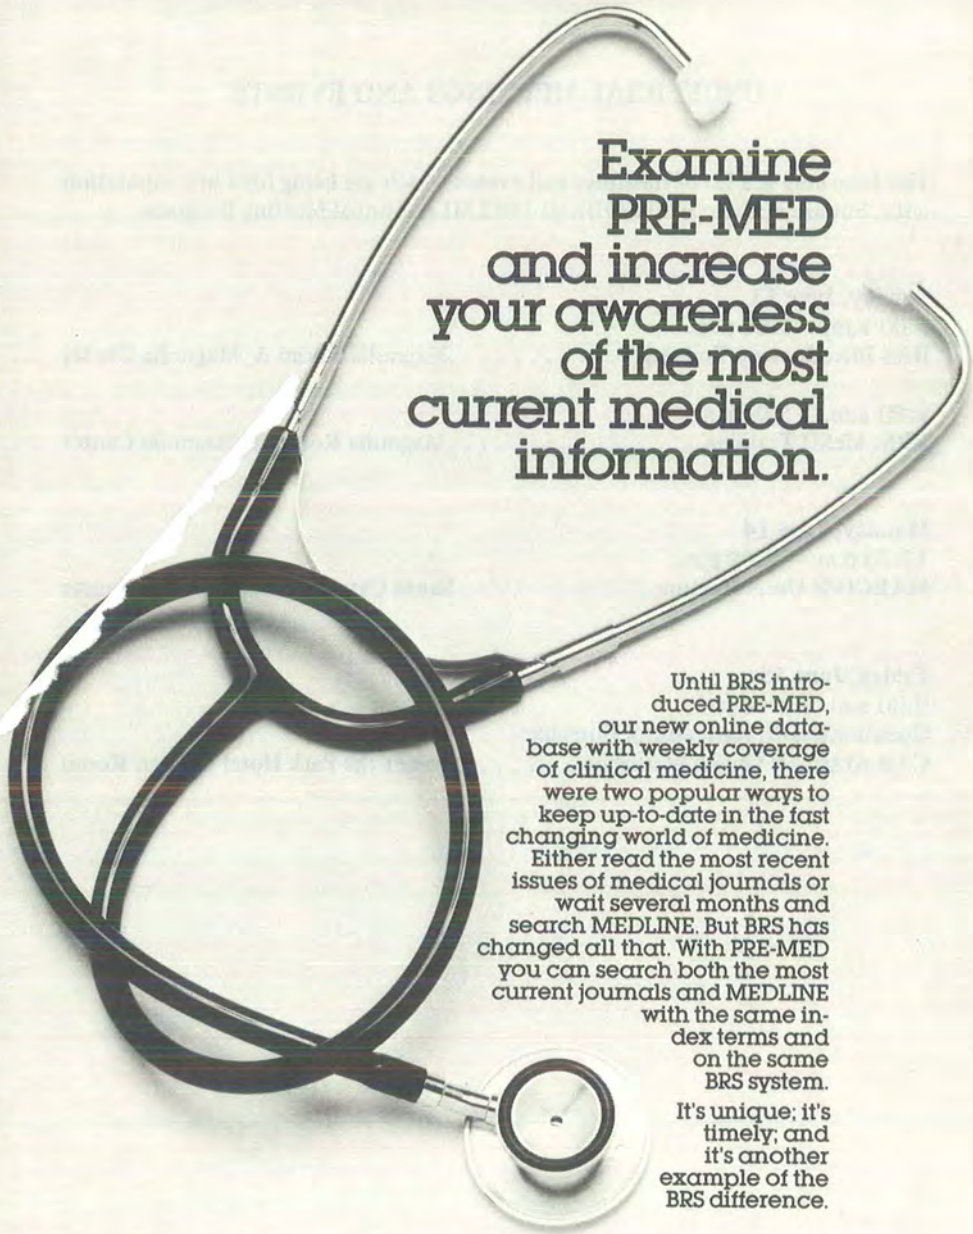

MARCIVE Users Meeting Santa Catalina Room, Bonita Center

Friday, June 18

9:00 a.m. – 4:00 p.m.

Commonwealth Agricultural Bureaux:

CAB Abstracts Online Workshop Inn at the Park Hotel Garden Room

**Examine
PRE-MED
and increase
your awareness
of the most
current medical
information.**

Until BRS introduced PRE-MED, our new online database with weekly coverage of clinical medicine, there were two popular ways to keep up-to-date in the fast changing world of medicine. Either read the most recent issues of medical journals or wait several months and search MEDLINE. But BRS has changed all that. With PRE-MED you can search both the most current journals and MEDLINE with the same index terms and on the same BRS system.

It's unique; it's timely; and it's another example of the BRS difference.

OCLC, Dublin

*Online Public Catalogs: Research Findings and
Implications*

An overview of current research projects studying the use of online public access catalogs is reported. These research efforts are funded in part by the National Science Foundation, The Council on Library Resources, and OCLC Online Computer Library Center. Data for these projects have been collected at more than 25 library systems throughout the United States. The methodologies used in these studies and preliminary findings are presented. The impact of the findings on online public access catalogs and technical services is offered.

Monday, June 14 (continued)

11:00 a.m. — 12:30 p.m. Invited Papers Session I (continued)

Nancy Gwinn, Associate Director of Program
Coordination, Research Libraries Group, Stanford

Online Support for the RLG Collection Management and Development Program

The Research Libraries Group, Inc. (RLG) has established a Collection Management and Development Program, several components of which are supported online through RLIN (Research Libraries Information Network), RLG's computerized bibliographic system. The RLIN Acquisitions Subsystem allows members to share information on both positive and negative selection decisions, particularly with regard to expensive items and serials. The subsystem also provides a mechanism for "petitioning" members to secure information about items under consideration for purchase and about serials cancellations. Management reports of use to collection development officers will soon be available.

Data for the RLG Conspectus, a tool for surveying and analyzing collection strengths and weaknesses in member libraries, is currently produced by central staff through a SPIRES program. Development work is under way to convert the Conspectus data into an online, interactive file that can be searched by institution, subject, and collection level. The Association of Research Libraries is considering adoption of the Conspectus for use by the entire ARL membership.

T. Daniel Tonkery, Associate University Librarian,
Technical Services and Bibliographic Products,
University of California, Los Angeles

Online Serials Processing Control Systems: Status, Problems, and Future Options

Since the early 1930's the library community has been experimenting with mechanized support of

Monday, June 14 (continued)

11:00 a.m. – 12:30 p.m. Invited Papers Session I (continued)

library processing functions. After nearly 50 years of automation projects, the library community has accepted automation in support of circulation, acquisitions, cataloging, and database services. Today's library has the potential to utilize online systems to support much of the traditional house-keeping functions in technical services. The bibliographic utilities provide each library with access to enormous bibliographic resources, the circulation vendors provide minicomputer-based systems which support multiple applications.

With all the technological achievements, all the software development, and practical experience with library automation, most libraries still lack a fully automated serials control system that performs check-in, claiming, binding, and invoice control. Current developments at a number of organizations may offer some support for automated serials control. A selected number of these options will be discussed along with an identification of implementation problems.

Brian Nielsen, Head, Reference Department,
Northwestern University Library, Evanston

An Unfolding, Not an Unveiling: The Ongoing Process of Creating an Online Public Catalog

A theoretical framework developed out of public policy research is used to shed light on the problem of preparing library staff and users for the introduction of an online catalog. The framework, a process model of innovation, suggests that to think of an online catalog as simply a new format for a catalog previously on cards is a serious mistake. For a library to respond creatively to the impending introduction of an online catalog, it is important for management to seek wide participation in the innovation process, including the drawing in of public services staff and even users into the creative

Monday, June 14 (continued)

11:00 a.m. – 12:30 p.m. Invited Papers Session I (continued)

effort. Some experiences of libraries which are now working with online catalogs are described to illustrate the breadth of change which may occur with this technological innovation.

SESSION II: EXPANDED ROLES FOR HOSPITAL LIBRARIANS

North Ballroom, Convention Center

Moderator:

Marilyn Schwartz, Chief Librarian, Thompson Medical Library, Naval Regional Medical Center, San Diego

Speakers:

Jane Belt, Medical Librarian and Coordinator of Continuing Education, Central Washington Hospital, Wenatchee

With the growth of hospital libraries to serve all hospital employees in their departmental, clinical, and educational training as well as continuing education needs, the hospital librarian has found an expanded role beyond clinical research for the physician. This role permits one to be an integral part of the organization supporting all those who care for the patient. At Central Washington Hospital in Wenatchee, Washington, the need for coordination of hospital-wide education meshed well with the education, experience and skill of the medical librarian. Therefore, with the combining of these two departments, the hospital has made a cost savings in office space, personnel, and resources. The librarian has gained input into the real needs of the departments and physicians and provides an on-target collection as well as a perception of future resource needs.

Monday, June 14 (continued)

11:00 a.m. — 12:30 p.m. Invited Papers Session II (continued)

Patricia L. Thibodeau, Director of Health Sciences Information Center and Research Administrator, Women and Infants Hospital of Rhode Island, Providence

Research duties were added to the job of the Health Sciences Information Center Director as a result of the former Director's interest in the federal regulations governing research. Administration recognized that the ability to locate and organize information is inherent to the development of research administration policy and procedures. Furthermore, it was a logical extension of the librarian's current job of providing the researchers with the data necessary to develop their projects.

The Director's position involves the basic duties of organizing Research Committee meetings, maintaining files and records, and answering correspondence. The Director must also ensure the researcher's and institution's compliance with state and federal regulations governing human and animal research. This means that ponderous regulations must be interpreted, summarized and translated; and then must be transformed into institutional policies and procedures. In order to ensure compliance, the Director must often work closely with researchers from the inception to the conclusion of the project. Funding, approval and acceptability of results may be dependent upon compliance.

The dual role permits one to see the direction of the research programs and therefore, to anticipate future information needs. It emphasizes the importance of the library in research and enhances the librarian's role as a resource in research.

Monday, June 14 (continued)

11:00 a.m. – 12:30 p.m. Invited Papers Session II (continued)

Rosemarie Taylor, Director of Library Services,
Wilkes-Barre General Hospital, Wilkes-Barre

This presentation focuses on one librarian's experience in administrative functions outside the traditional library role in the hospital. Included will be a description of the librarian's duties in helping revise personnel policies, investigating sick time use in the hospital and creating an incentive policy, helping reorganize the employee health service, and participating in the establishment of the hospital's day care center. The impact participation in these functions has had on library service in the hospital will also be discussed.

Nardina L. Nameth, Director, Department of
Library and Audiovisual Services, Henry Ford
Hospital, Detroit

The desire of hospital administrators to consolidate educational support services has led in many cases to the librarian accepting responsibility for the audiovisual production unit in hospitals. At Henry Ford Hospital in Detroit, Michigan, this arrangement has been in effect since April, 1979. The challenges of a dual responsibility, managing a creative enterprise and the realities and issues of photographic, film and video production management will be discussed.

SESSION III: SELECTED ISSUES IN DRUG INFORMATION

Sponsored by the Pharmacy and Drug Information
Section

South Ballroom, Convention Center

Moderator:

David Morse, Technical Services Librarian,
Norris Medical Library, University of Southern
California, Los Angeles

Monday, June 14 (continued)

11:00 a.m. – 12:30 p.m. Invited Papers Session III (continued)

Speakers:

Bonnie Snow, Information Specialist, Lockheed Information Systems, Arlington

Online Database Coverage of Pharmacy Periodicals

Published journal lists for individual computerized files often do not indicate degree of coverage (i.e., cover-to-cover, selective, rush-priority, etc.); nor are such lists readily available for many databases or categorized by subject area. *Ulrich's* and other reference tools, as well as many journal editors, provide indications of indexing coverage, but such listings are incomplete and generally focus on well-known hardcopy services, neglecting newer online resources or those which have no print equivalent. This paper will describe an attempt to identify core journals in the pharmaceutical and drug information subject area, and a subsequent statistical analysis of online database coverage of these core journals in the past three years. Discussion will include comparisons regarding lag time, depth of indexing, English language coverage, and overlap.

Terry Ann Jankowski, Reference Librarian, Health Sciences Library, University of Washington Libraries, Seattle

Drug Information for the Layman

Medical librarians are frequently asked for information about drugs by the general public. These library users create problems in conducting the reference interview because of their reluctance to specify their needs and their lack of medical knowledge. Finding sources of information written at their level of sophistication is difficult. This paper explores some of the commonly asked questions and appropriate sources for answering them.

Monday, June 14 (continued)

11:00 a.m. – 12:30 p.m. Invited Papers Session III (continued)

Gregory A. Thompson, Pharm. D., Drug Information Center, Los Angeles County/USC Medical Center

Review of Drug Information Services in a Drug Information Center

Drug information centers have been developed to meet the need for quick and accurate drug information in the hospital setting. The Drug Information Center (DIC) of the Los Angeles County/USC Medical Center is co-directed by a pharmacist and a physician and is operated daily by two staff pharmacists and a secretary. The DIC is available for health professionals from the Medical Center and also takes calls from throughout Southern California. The DIC's primary job is to act as a quick reference to answer patient care questions related to drugs and drug therapy. It is also involved in the Medical Center's Drug Utilization Review Program. This presentation will provide an introduction to the information services provided by DIC's and discuss the complementary roles of DIC's and libraries in the provision of drug information.

Eileen Eandi, Public Services Librarian, Norris Medical Library, Health Sciences Campus, University of Southern California, Los Angeles

Online Retrieval of Drug Abuse Information

This paper will discuss the selection of appropriate databases and the formulation of optimum search strategies for retrieving references on five areas of drug abuse: 1) health effects, 2) treatment, 3) education and prevention, 4) sociocultural aspects, and 5) epidemiology. The abuse of both legal and illegal drugs will be covered. Alcoholism and smoking, as aspects of the broader field of substance abuse, will also be considered. Terminology inconsistencies which often make it difficult to distinguish between drug and substance abuse, and physical and

Implications for Libraries in Changing Medical Information Systems

The role of the library in the context of changing information systems and technologies that are affecting academic health centers will be discussed. This interactive panel will review issues raised in the NLM-sponsored AAMC study from the perspectives of hospital and medical school libraries, senior administrators of health centers, and the NLM.

Future Directions for the 1980's

The hospital librarian's role will be discussed from the perspective of unlimited, challenging horizons with a practical identification of skills necessary to more than survive in today's austere climes; the effect of new directions by MLA on the hospital library membership will be explored; and the rationale for greater cooperation and communication between different kinds of libraries will be addressed.

Embassy Room, Embassy Center

Moderator:

Jacqueline Doyle, Reference Librarian, Biomedical Library, University of California, San Diego

Speakers:

E. Richard Brown, Ph.D., Assistant Professor, School of Public Health, University of California, Los Angeles

The Potential of Voluntary Health Agencies for Community Education and Organization to Resolve Environmental Health Problems

The effective resolution of community health and safety problems, such as those resulting from toxic substance exposures, requires the informed and active participation of community members. Major voluntary health agencies have traditionally played little or no role in efforts to reduce or eradicate environmental health problems. Recently, efforts have been undertaken to involve these agencies in educational and legislative efforts to resolve these problems.

This presentation reports on the experience of the Santa Monica, California, branch of the American Cancer Society in developing a "Community Forum on Toxic Substances and Health" as a vehicle for community education and organization. The ACS branch formed a coalition of environmental, health, labor, and community groups which planned the forum around problems of occupational exposures, toxic waste disposal, pesticides, air and water pollution, food additives, and household and community exposures.

The presentation will assess the extent to which program objectives were fulfilled, analyzes the

Thursday, June 17 (continued)

2:00 p.m. — 3:30 p.m. Invited Papers Session IV (continued)

factors influencing the outcomes of this educational and organizational project, evaluates its impact on ACS, and makes recommendations for future use of such vehicles.

Sheldon Greenfield, M.D., Associate Professor of Medicine and Public Health, School of Medicine, University of California, Los Angeles

Changing Patient Behavior through Information Sharing

In order to increase patient participation in medical care, we developed an individualized education program for chronic disease patients. In a one-hour training session, patients are presented with their own medical records and structured materials for reading and understanding them. Through the review of their medical records, patients are given the relevant details regarding their health care. This review is then coupled with a second short session designed to improve effective information-seeking skills. In a randomized controlled trial, comparing this intervention to a typical chronic disease education program, we measured the following outcomes: patient participation as reflected in question-asking and mutual decision making during the doctor-patient encounter; patient adherence to medical regimens; patient satisfaction, and control of the chronic disease. Factors such as demographic characteristics, locus of control, health beliefs and perceived degree of responsibility in the doctor-patient relationship that influenced the outcomes, were measured. The overall aim of this research was to produce a valid, feasible and generalizable program which will involve patients in their medical care and thereby improve health outcomes.

Thursday, June 17 (continued)

2:00 p.m. — 3:30 p.m. Invited Papers Session IV (continued)

Thomas J. Kean, MPH, Special Assistant, Office of Cancer Communications, National Cancer Institute, Bethesda

Issues in Disseminating Cancer Information Through Libraries

Throughout the last decade there has been growing public interest in the subject of cancer. All types of public media are providing increasing coverage of this subject area. In response to this growing demand, the National Cancer Institute and other member groups of the National Cancer Program have been engaged in developing and/or expanding their public information/education resources and programs. A major problem facing those responsible for the dissemination of such information is that the body of knowledge related to cancer is very dynamic, and is changing rapidly as research results come available. It is believed that libraries, medical and public, afford an excellent opportunity for disseminating such information. The issues involved in utilizing and working with libraries in the context of a rapidly expanding knowledge base will be discussed. An overview of existing and planned information resources available to libraries will also be given.

Gordon L. Scott, Consumer Affairs Officer, Los Angeles District, Food and Drug Administration, Los Angeles

FDA's Role in Providing the Public With Consumer Health Education

The Food and Drug Administration's principal responsibility is to assure the public that products regulated by the FDA are safe, sanitary and properly labeled. Inspections are held, standards are set and in certain cases products are approved before marketing. In addition to enforcement activities, the FDA sponsors a variety of educational programs aimed at informing the public about important

Thursday, June 17 (continued)

2:00 p.m. — 3:30 p.m. Invited Papers Session IV (continued)

health issues. Such programs are organized by Consumer Affairs Officer (CAO's) of whom there are more than 50. CAO's are often the first-line contact with state officials, the public and the media on "hot" and current issues. CAO's conduct workshops for teachers, nurses and other professionals. They give speeches, staff exhibits and regularly interact with the news media. Other informational activities carried out by local FDA offices include: responding to telephone and written inquiries, receiving consumer complaints, and providing copies of FDA publications (English and Spanish).

V: EVALUATION OF SERVICES

Magnolia Room, Magnolia Center

Moderator:

Gail Yokote, Head, Information Services, Texas Medical Center Library, Houston

Speakers:

Teri A. Denson, Ph.D., Senior Evaluator, Development and Demonstration Center in Continuing Education for Health Professionals, University of Southern California, School of Medicine, Los Angeles

Program Evaluation: Adventureland, Tomorrowland, or Fantasyland?

Research has traditionally been associated with classical concepts of experimental design. While appropriate to laboratory research, these principles are not always the best guides for development or demonstration studies or for most program evaluation tasks. Some newer concepts from action research, naturalistic evaluation and qualitative analysis are both useful and sound guides for planning evaluation studies in the library setting.

Thursday, June 17 (continued)

2:00 p.m. — 3:30 p.m. Invited Papers Session V (continued)

These newer approaches acknowledge the inherent "messiness" of most real-life research situations, including the inability to exercise such hallowed procedures as randomization, interval metrics, and experimental controls. Instead of offering apologies, these methods present alternatives that actually enhance the usefulness of evaluation results.

The wise participant in evaluation studies does not, however, embrace these so-called "new" methods indiscriminately or use them as an excuse for sloppy research. A useful framework for "evaluating" evaluations is found in *Standards for Evaluation of Educational Programs, Projects, and Materials* (McGraw Hill Book Co. 1981).

Corporate Technical Library, The Upjohn Company,
Kalamazoo

Evaluation of a Computerized In-House SDI System
Since 1967, the Upjohn Company's Corporate Technical Library has provided an in-house computerized selective dissemination of information (SDI) program based on the Ringdoc database generated by Derwent Publications Ltd., London, England. Ringdoc is a literature alerting and retrieval service specifically designed to meet the information and documentation requirements of the pharmaceutical industry. Monthly computer tapes of the Ringdoc database are processed in-house on an IBM mainframe using software developed for this purpose in 1967. Vendor announced tape format changes necessitating new retrieval software together with decreased use statistics and the availability of other SDI systems prompted an evaluation of the in-house SDI program to determine how well it was still meeting user requirements for SDI. Results of the evaluation are reported.

Being There: Effect of the Patron's Presence on MEDLINE Search Results

An evaluation was conducted at the University of Iowa Health Sciences Library to determine what effect the patron's presence had on MEDLINE search results. One hundred patrons participated over a four-month period. Three main criteria were used: search precision, search recall, and patron satisfaction. Each MEDLINE search was run twice, once prior to the patron's arrival and a second time during the scheduled appointment with the patron. The two searches for each patron were run by different searchers, and the four searchers alternated running the patron-absent or the patron-present search. The patron was asked to compare the citations on the two searches by checking each printout for relevant citations. A short questionnaire was administered to determine general patron information and satisfaction measures for each search. The extensiveness of the interview for the patron-absent search was varied in order to determine if the depth of the initial interview would affect the search results. Evaluation of the findings indicated an increase in precision, recall, and patron satisfaction for the patron-present search. Some difficulties in designing the experiment are discussed and implications of the evaluation results are considered.

Improving the Quality of Your Work Life through Evaluations

Evaluation within a library's information services
department can produce significant outcomes

Thursday, June 17 (continued)

2:00 p.m. — 3:30 p.m. Invited Papers Session V (continued)

resulting in improved quality of work life. Improved services, increased accountability, effective rationale for budgeting and increased "political points" are all potential results of well planned and executed evaluations in the library setting.

Evaluation of information services must be planned and purposeful to provide useful information. They may be performed at the end of a project, as needed, such as at reaccreditation time, or systematically, as with daily reference statistics.

Four types of data collection methods are useful in evaluating information services: written surveys, interviews, unobtrusive/observation methods and a combination of the three types.

For the novice performing evaluations, it is beneficial to seek assistance from persons trained in evaluation methods. Through evaluation, the librarian can develop new skills and become a better manager or administrator while improving the quality of library services, its image and the work environment.

PRESENTING 2 OF SPRINGER'S
5 AJN BOOK OF THE YEAR WINNERS

Nursing Information Systems

Harriet H. Werley, R.N. Ph.D
Margaret Grier, R.N., Ph.D., eds.

Discusses the systematizing and computerizing of information for enhancing nursing care, education and research.

448pp / 1981 / 0-8261-2520-4 / \$27.50

Inferences of Patients' Pain and Psychological Distress

Lois L. Davitz, Ph.D and *Joel R. Davitz, Ph.D.*

The full report of the authors' six-year international study focusing on the factors that influence nurses' varied reactions to the pain of patients.

220 pp / 1981 / 0-8261-3360-6 / hard \$25.00

NEW

Dictionary of Rehabilitation Medicine

Herman L. Kamenetz, M.D.

This superb resource book offers in a single volume a look into the multidisciplinary world of medical rehabilitation in its broadest aspect.

384 pp / 1982 / 0-8261-3320-7 / hard \$21.95

Advances in Disease Prevention

Volume 1

Charles B. Arnold, M.D., et al., eds.

Integrates new preventive care research findings in this interdisciplinary field. The theme of the first volume is chronic illness.

320pp / 1981 / 0-8261-2830-0 / hard \$35.00

Elderly Patients and Their Doctors

Marie R. Haug, Ph.D., ed.

Exploration of doctor-elderly patient relationship.

240 pp / 1981 / 0-8261-3570-6 / hard \$20.95 (text price 10 or more: \$14.95)

NEW

Stress and Human Health

Glen R. Elliot, Ph.D., M.D. and *Carl Eisendorfer, Ph.D., M.D., eds.*

Seminal report sponsored by the National Academy of Science's Institute of Medicine summarizes current knowledge on stress.

400pp / 1982 / 0-8261-4110-2 / hard \$34.95

The Evaluation of Teaching in Medical Schools

Robert M. Rippey, Ph.D.

Synthesizes and interprets the research on the evaluation of teaching in order to provide guidelines for the implementation of effective programs.

173pp / 1981 / 0-8261-3440-8 / hard \$23.95

An Invitation
to own the magnificent facsimile of

**The Anatomical Studies of
Leonardo da Vinci**
lodged in
The Royal Library at Windsor Castle

CREATED in facsimile by English craftsmanship and by brilliant international scholarship, the folio-size volumes bound in Nigerian goatskin are available in an English-language edition of 998 numbered sets. The work consists of three volumes, two comprising Leonardo's text in Italian and English in addition to artistic and medical commentary, and one a portfolio box of 201 drawings printed in up to six colors per plate. The plates were produced in a studio especially constructed by Harcourt Brace Jovanovich, with permission and under regulation of the Crown, on the grounds of Windsor Castle. Price: \$6,600 a set.

For further information, write or telephone.

ENTER THE
COMPUTER AGE
WITH SAZTEC

Computer services offered for the publishing, library and database industries. Saztec's expertise in upfront and historical file conversions offer the prospective firms a proven and economical means to enter the computer age.

The rapid expansion into electronic publishing, automated circulation systems and on-line database retrieval requires an experienced and professional computer services firm. Saztec is the expert. Saztec can conform to your present inhouse system or provide data in the formats of most software packages.

Data conversion includes system analysis, programming, clerical markup for typesetting, key entry and verification and computer formatting and editing.

Saztec's worldwide facilities with offices in seven countries and nine U.S. locations offer a capacity of over 500 million characters per month.

Intensive care for biomedical information. Dialog.

Dialog has now added the MEDLINE database (available worldwide), and that makes us the world's most comprehensive single source of medical, life science and biomedical reference information.

In that vital database group, MEDLINE joins Excerpta Medica, Biosis, International Pharmaceutical Abstracts, IRL Life Sciences, and Sci-Search. That's a total of more than 10 million medical, pharmaceutical, and biochemical references.

As the world's largest online information retrieval system, Dialog currently has more than 130 databases and 50 million references and abstracts. But the benefits of

biomedical searching in Dialog don't end there. For example, our *online* coverage of MEDLINE goes all the way back through 1966. And we offer a variety of contract options to suit any budget.

With our unbeatable collection of databases, excellent training programs and superb documentation, Dialog is clearly the best choice for modern reference searching, particularly in the biomedical field.

Get complete information from Dialog Information Services, Dept. 70, 3460 Hillview Ave., Palo Alto, CA 94304. Call toll-free (800) 227-1927. In California, call (800) 982-5838.

Booth #69-70

WE CAN CARVE THIS MOUNTAIN DOWN TO A MOLEHILL!

Busy health care professionals are faced with a mounting dilemma: how to distill cumbersome medical journals into the "hands-on" knowledge needed to meet today's challenges.

The UPDATE SERIES periodicals feature the nation's leading authorities presenting the latest developments and state-of-the-art techniques in medicine's most demanding specialties.

"Hands-on" tools for today. . .
Valuable references for tomorrow.
